Growing Research and Consulting Firm Seeks IT Project Manager in Germantown, MD

Advocates for Human Potential, Inc. (AHP) is seeking an IT Project Manager based in Germantown, MD, to support its business growth. The successful candidate will be responsible for leading projects to design and develop web enabled e-business applications for health and human services clients.

Specifically, the individual will:

- Assess how clients use technology and the client's existing technical investment to determine the best approach at the least cost.
- Develop project plans, budgets and timelines.
- Marshall client IT and external IT resources to meet project deliverables.
- Manage project expectations and deliver on project goals.
- Prototype requirements as defined by the client.
- Code features and functionality based on business needs.
- Ensure quality by ongoing testing.
- Add features and functionality as required.
- Ensure performance and availability requirements are met.
- Serve as a technology communication link for the Program Manager to insure the client requirements are met.
- Collaborate with Program Managers and Business Directors in developing proposals for IT solutions.

This is a unique opportunity for an outstanding Software Project Lead to architect cutting edge technology solutions that will enhance the performance of health and human services agencies.

Qualifications

To be considered for the position, you must have BS in Computer Science, five to ten years of software development experience with five years in web-enabled applications, including the latest Microsoft tools, five years in object oriented design and one year as a project lead preferably with a software development consulting firm. Candidates with five to eight years who have the required experience and skills but who have not served in a lead role will be considered for a Senior Application/Web Developer position. Technical skills required for the position involve extensive experience with:

- OS: Vista and Windows
- Languages: C++, C#
- Databases: SQL Server
- Object oriented design: Java, Flash
- Preferred experience with Sharepoint

Outstanding project management, interpersonal and problem solving skills are also a must for success in this role.

Competitive salary and attractive benefits package. Qualified individuals please email resume and cover letter to careers@ahpnet.com and reference Job 190. AHP is an equal opportunity employer.
