Growing Research and Consulting Firm Seeks Senior Scientist for Health Care Policy in Sudbury, MA

Status: Part or Full Time (allows for concurrent academic appointment).

AHP's Center for Research and Evaluation has an immediate opening for a Senior Scientist for Health Care Policy in Sudbury, MA. The successful individual will be a "thought leader" in the health area; have business development skills; a doctoral degree related to health policy; and relevant leadership experience in academia, government, or consulting.

This high-level position will:

- Report to the Director of the Center for Research and Evaluation;
- Design and lead a new health policy/health services research focus area;
- Lead and manage the conceptualization, design, and implementation of a range of federally funded research and evaluation projects;
- Organize and lead business development activities in the health area;
- Motivate, mentor, and supervise mid and senior-level staff;
- Maintain a scientific presence, through regular publications and presentations; and
- Participate in annual strategy development and business planning for the Center.

Qualifications

- Ph.D. in public health, health policy, epidemiology, health economics, or related field; and/or MD; minimum of 15 years in the field and 10 years in a leadership position
- Demonstrated track record securing large grants and contracts as well as existing relationships with key potential funding sources, such as AHRQ, HRSA, CDC, NIH
- Exceptional oral, written, and formal presentation skills
- Experience with large secondary data sets; knowledge of data analysis techniques
- Collaborative team player with strong project management skills
- Ability to recruit and retain talented individuals

Competitive salary and attractive benefits package. Qualified individuals please email resume and cover letter to careers@ahpnet.com and reference Job 185. AHP is an equal opportunity employer.
